OBJECTIVE

A versatile, quick learning, and outgoing team player seeking full-time SDE roles. 2x AWS Certified (Associate & Professional) with 2 years experience.

EDUCATION

Web Development Boot Camp, Fullstack Academy 2020
Bachelor of Science, Eastern Illinois University 2011 - 2015

SKILLS

Technical Skills JavaScript, Python, React, VueJS, FastAPI, Express, AWS, Boto3, and more
Soft Skills Team Leadership, People Synergy, Energetic, Proactive

EXPERIENCE

Software Engineer Jun 2021 - Present
Charter Solutions, Inc. *Plymouth, MN*

- Full stack development for Boulder Contracting's (home builders in MN) app using VueJS, AWS API Gateway, Lambda, & AWS RDS. Upgraded a manual paperwork procedure to be online for employees, agents, and clients leading to increased profits and productivity.
- Full stack development for a cloud-agnostic application for Cannon Equipment utilizing JavaScript, Python, AWS, Azure, FastAPI, Docker, and MongoDB. App is used for automatic sorting of products coming in on a conveyor belt system.
- Enhanced Charter's managed services product with Datadog by implementing Terraform code.
- Built internal data lake and ingestion process with AWS CDK, AWS Lambda, AWS SQS, AWS CloudWatch, AWS S3, and Replicon API. App is used for reporting and data storage of employee information. Allowing upper management to generate better reporting.

Full-Stack Engineer Jan 2021 - Apr 2021
agnoStack *Chicago, IL*

- Implemented [Shippit](#) provider integration with [Bigcommerce](#), allowing users to directly view real-time shipping info within the [agnoStack](#) plugin.
- Implemented a [color-changing status](#) feature based on the client's eCommerce provider.
- Created and edited markdown files within Gatsby for [release notes](#) on the website.
- Developed scripts to scrape data from public websites in order to improve customer reach using Node, Puppeteer, and basic CSS query selectors.

Teaching Fellow Sept 2020 - Jan 2021
Fullstack Academy *Chicago, IL*

- Debugged, mentored, and taught JavaScript to over 50 students.
- Oversaw student projects as a technical mentor and project manager.
- Performed weekly code reviews with students.
- Led weekly technical interview white-boarding problems.
- Interview prospective students for admission to the program.

PERSONAL PROJECTS - ASK ABOUT MORE

Jake Armijo Personal site with React/Nextjs. Back-end built with Lambda and deployed with AWS CDK

[Today's Tilts](#) App for NHL game stats built with CICD, React, NHL API, AWS Lambda, Route53, S3, and AWS ACM.

EXTRA-CURRICULAR ACTIVITIES

- Fly Fishing, Hockey, & family

LEADERSHIP

- Youth Hockey Coach & Coding boot camp mentor
